About Radin Company

Introduction of Kadkhoda Company

Kadkhoda Company, with over 90 years of distinguished experience in tomato paste production, stands as one of the pioneers in this field in Iran and the Middle East. We take pride in delivering high-quality products with an exceptional taste by utilizing advanced technologies and the finest raw materials

History

The history of tomato paste production in Iran dates back to 1923 (1302 in the Iranian calendar) during the reign of Naser al-Din Shah Qajar. The introduction of tomato seeds to the country by Moayyer al-Mamalek, the head of the mint, marked a turning point in this industry. Since then, tomatoes have become a staple food on Iranian tables

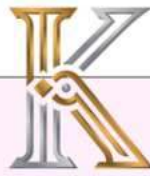

kadkhodae business group

Global Market

Globally, 210 million tons of tomatoes are cultivated annually, of which 80% are consumed fresh, and only 20% are processed into tomato paste and other derivatives. Countries like China, India, and the United States lead the production, while Iran ranks seventh globally, establishing itself as a significant hub in this industry

Quality and Standards

Quality is a key factor in choosing tomato paste. One of the main criteria is Brix, which measures the sugar content and concentration of the product. The standard Brix level for tomato paste ranges between 25 to 28, ensuring a thicker consistency and sweeter taste. These standards, approved by the National Standards Organization of .Iran, reflect our commitment to quality
